

PREM SHINDE *Software Engineer | Python Developer | Data Analyst*

✉ shindeprem.160205@gmail.com ☎ 8999542585 📍 Thane 🔗 LinkedIn 🐙 GitHub

SUMMARY

Computer Engineering graduate with a foundation in Python, R, SQL, Data Analytics, Data Wrangling, Data Transformation, and Data Visualization, with hands-on knowledge of Microsoft Power BI, Excel, and Alteryx for data processing and workflow automation. Familiar with developing data-driven solutions, applying advanced analytics, analyzing business processes, and identifying opportunities for process improvement. Knowledge of risk analysis, governance, internal controls, compliance, and financial data analysis, with an interest in using technology and analytics to support Audit & Assurance and informed business decision-making. Strong analytical, problem-solving, communication, collaboration, and continuous-learning skills.

EDUCATION

Bachelor of Engineering in Computer Engineering

Vighnagarata Trust's Shivajirao S. Jondhle College of Engineering & Technology, Shahpur

2022 – 2026

Asangaon, Thane

CGPI

6.74

SKILLS

- **Programming:** Python, R, SQL
- **Data Analytics:** Data Analysis, Data Cleaning, Data Wrangling, Data Transformation, Exploratory Data Analysis (EDA), Basic Statistics
- **Data Visualization:** Microsoft Power BI, Excel, Data Visualization, Dashboard Development
- **Automation & Data Processing:** Alteryx, ETL, Workflow Automation, Data Processing
- **Databases & Tools:** MySQL, Git, GitHub
- **Computer Science Fundamentals:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS

CERTIFICATES

- Alteryx Bootcamp By Kinga Kleine
- Master Data Analysis: Python, Stats, Gen AI, EDA, AWS, SQL, Excel, Power BI, Tableau, ETL, Snowflake & Feature Engineering

PROJECTS

Business Sales Analytics & Risk Dashboard

Python, Pandas, SQL, Power BI, Excel

- Cleaned and transformed transactional data using Python and Pandas, handling missing values, duplicate records, inconsistent data types, and data-quality issues.
- Performed exploratory data analysis and statistical analysis to identify sales trends, customer patterns, regional performance, and unusual transaction behavior.
- Used SQL to extract, join, filter, aggregate, and analyze business data for generating meaningful insights.
- Developed an interactive Power BI dashboard to visualize KPIs, sales trends, customer and regional performance, and potential transaction anomalies for data-driven decision-making.

Automated Data Processing & Reporting Workflow

Alteryx, Python, Excel/CSV, SQL, Power BI

- Developed an automated Alteryx workflow to ingest, clean, validate, transform, join, and aggregate data from multiple Excel/CSV sources.
- Implemented data-quality checks to identify missing values, duplicate records, invalid entries, and unusual transactions for further review.
- Used Python and SQL for supporting data analysis and prepared processed datasets for Power BI dashboards and automated reporting.
- Built interactive Power BI visualizations to monitor key business metrics, data exceptions, and performance trends, supporting data-driven decision-making.
